

POWER SAVER PROGRAM AGGREGATOR

Saving Energy Together

from Austin Energy

Is an innovative idea/solution to help businesses run more efficiently and improve the reliability of Austin Energy's electrical grid.

Austin Energy works with energy management service companies or self aggregators to help automate businesses, making them run more efficient, reduce energy consumption and save \$\$\$ on utility costs.

These are just a few features of what an energy management system can monitor and control in your facility;

- Cooling and Heating Equipment
- Compressors
- Refrigeration Equipment
- Lighting

FINANCIAL INCENTIVES ARE AVAILABLE

Incentives are offered to energy management companies or self aggregators who run more efficiently and reduce energy consumption in return for allowing Austin Energy to request energy reductions/curtailment events.

Curtailment Events occur:

- June 1st thru September 30th – no holidays or weekends.
- Between 3:00 pm and 8:00 pm
- Must be able to curtail a minimum of 10kW per facility site or 15% of summer peak load
- A minimum of three (3) aggregated facilities or minimum 30kW for self aggregates
- A minimum of 4 curtailments, to an anticipated 15 curtailments per year

Let Austin Energy make it possible for your businesses to have an Energy Management System and profit from it!
