

Load Profiler Has Been Expanded Web-based Energy Analysis Tool

Become an Energy Expert with new metering technology.

Identify peak loads and analyze opportunities to reduce them. Pinpoint unusual or unnecessary loads. Use historical data for accurate budgeting and generate comprehensive reports. Energy data is presented in user-friendly graphs, tables and reports.

Average Profile all Accounts - February 1, 2006 through March 18, 2006

Use Load Profiler to:

- Evaluate new energy conservation measures
- Monitor power factor
- Easily identify energy inefficiencies
- Analyze opportunities to shift loads

For more information, visit www.austinenergy.com/go/loadprofiler please contact Bill Sparks at 505-3663, Murray Jones at 505-3640, or your Key Account Manager.

Take control of your company's energy usage and save money

Load Profiler Standard: Austin Energy's best value for multiple accounts
